ICT Express Information & Communications Technology

ICT Express

Volume 12 (2026)

Editorial Board

Editor-in-Chief

Yeong Min Jang, Kookmin University, South Korea

Co-Editors-in-Chief

Sungrae Cho, Chung-Ang University, South Korea
Yacine Ghamri-Doudane, La Rochelle University, France
Dong Seog Han, Kyungpook National University, South Korea

Emeritus Editor-in-Chief

Eun-Soo Kim, Kwangwoon University, South Korea

Zhisheng Niu, Tsinghua University, China
Zary Segall, Royal Institute of Technology, Sweden

AI and its Applications

Executive Editors

Peter Peer, University of Ljubljana, Slovenia
Computer vision, biometics
Gianluca Reali, University of Perugia, Italy
Modeling, Information encoding, Analysis in molecular communication systems, Nanoscale networking and applications
Young-Joo Suh, Pohang University of Science and Technology, South Korea
AI foundation, ICT Applications

Youngchul Sung, Korea Advanced Institute of Science and Technology, South Korea
Beamforming, Interference management, Multiple access, MIMO techniques
Signal processing for communications

Editors

Aladdin Ayesh, De Montfort University, United Kingdom
Ambient intelligence, Cyber-physical systems and networking, Mobile Robots, Sensor networks, Big Data
Seung Jun Baek, Korea University, Korea, Republic of
Cellular and broadband wireless networks, Heterogeneous networks, Wireless local area networks, Internet of things (IoT)
Tossapon Boongoen, Aberystwyth University, United Kingdom
AI, Machine/deep learning, Image analysis and pattern recognition, Fuzzy systems and security
Bong Jun Choi, Soongsil University, Korea, Republic of
Smart Grid, Federated Learning, Distributed Intelligence, IoT, Security, Energy efficient networks,
Distributed mobile wireless networks
Jo Woon Chong, SungKyunKwan University, Korea, Republic of
IT for livestock, Medical and Bio-IT convergence, Medical/Bio signal processing, Sensor networks,
U-health(Smart care, Smart living, U-health infrastructure, U-health applications)
Jeremiah Deng, University of Otago, New Zealand
Machine learning, Computational intelligence, Performance modeling, Mobile computing
Mohamed Amine Ferrag, Technology Innovation Institute, United Arab Emirates
Wireless Network Security, Applied Cryptography, System Security and Data Forensics
Xiaodi Huang, Charles Sturt University, Australia
Information Visualization, Visual analytics, Web services, Computer applications
Kyu-Baek Hwang, Soongsil University, South Korea
AI, Machine learning, Bioinformatics
Soman K.P, Amrita Vishwa Vidyapeetham, India
Deep machine learning
Joongheon Kim, Korea University, South Korea
Millimeter-wave, Stochastic optimization, Deep learning, Reinforcement learning
Won Hwa Kim, Pohang University of Science and Technology, South Korea
AI, Medical vision
JeongGil Ko, Yonsei University, Korea, Republic of
Mobile and ubiquitous computing system design for the Internet of Things, Embedded and mobile sensor data-based machine learning application system design, Deep learning model compression and optimization for embedded and mobile device operations, Healthcare applications using mobile and embedded computing systems, Interfacing humans with mobile sensing system
Charalampos Konstantopoulos, University of Piraeus, Greece
Parallel and distributed computing, Mobile computing, Sensor networks, Multimedia computing, Wireless Sensor Networks, Security Issues, Wireless Networking, Internet and Web Applications, Cybersecurity
Jin Tae Kwak, Korea University, South Korea
Multimodal medical imaging, Digital and computational pathology, Computer-aided diagnosis, Radiology-pathology correlation, Datamining, Artificial intelligence, Machine learning and deep learning
Ioannis Kypraios, De Montfort University, United Kingdom
AI/ML for Healthcare Technologies with the use of IoT sensors,
Secure communication between IoT sensors, Blockchain
Edmund Lai, Auckland University of Technology, New Zealand
Digital signal processing, Information theory, Artificial neural networks, Computational and swarm intelligence,
Machine learning
Chul Lee, Dongguk University, South Korea
Image restoration, Power-constrained image/video processing, Computational imaging, High dynamic range (HDR) imaging
Jungwoo Lee, Seoul National University, Korea, Republic of
Wireless communications, MIMO techniques, Green communications, Interference alignment

Gyu Myoung Lee, Liverpool John Moores University, United Kingdom
IoTs, Future networks, Multimedia services, Energy saving technologies including smart grids
HyungJune Lee, Ewha Womans University, Korea, Republic of
Edge AI, Distributed AI, Edge computing
Lin Lin, Tongji University, China
Molecular communication, Internet of nanothings, Neural communication
Pavel Loskot, Zhejiang University-UIUC Institute, China
Signal processing, Mathematical modeling, Machine learning, Wireless communications, Biomedical applications
Zhanyu Ma, Beijing University of Posts and Telecommunications, China
Pattern recognition, Machine learning, (non-Gaussian) statistical modeling, Big data
analysis, Speech and image processing, Computer vision, Bioinformatics
Kyeong-Sik Min, Kookmin University, South Korea
Circuit, System IC for AI, IoT, Low-power VLSI, Memory design and power IC design
Alok Mishra, Norwegian University of Science and Technology, Norway
Software engineering, Artificial intelligence, Digitalization and information systems
Noseong Park, Yonsei University, South Korea
Sensor Network, Internet of Things (IoT)
Parameshachari B. D., Nitte Meenakshi Institute of Technology, India
Image Processing, Network Security, Pattern Recognition, Data Science, IOT, Computer Vision, Language Processing
Anand Paul, Kyungpook National University, Korea, Republic of
Block Chain, Digital Twinning, Internet of Vehicles, Regression, Big Data Analysis
Hassaan Khaliq Qureshi, National University of Sciences and Technology, Pakistan
Computer Networks, IoTs, Cyber Physical Systems, Network Security
Junhee Seok, Korea University, Korea, Republic of
Machine Learning, Artificial Intelligence, Big Data Analytics, Biomedical Informatics
Won-Yong Shin, Yonsei University, South Korea
Data mining, Machine learning, Mobile computing, Wireless networking
Chun-Wei Tsai, National Sun Yat-sen University, Taiwan
Data mining, Clustering and classification, Internet of Things, Smart home, Healthcare, and Smart Grid, Deep learning, AutoML, Hyperparameter optimization and optimizer, Metaheuristic algorithms, Search economics, Pattern reduction and evolutionary computation
Xiaoyan Wang, Ibaraki University, Japan
AI for wireless communication, AI for mobile networking, Intelligent networking, Cloud computing, Big data systems,
AI for wireless sensing
Charles Wen, National Yang Ming Chiao Tung University, Taiwan
Applying data mining and machine learning techniques to SoC designs, Radiation hardening, Functional verification, Timing analysis, Cloud networking, Performance analysis, Architecture design of large-scale datacenters
Qiang Yang, Nanjing University of Information Science and Technology, China
Evolutionary Algorithms on Large Scale Optimization, Multimodal Optimization, Dynamic Optimizaiton and Multi/Many-objective Optimization and their applications on real-world problems, such as Taxi Scheduling, Travel Salesman Problems and Capacitated Vehicle Routing Problems
Chia-Hung Yeh, National Taiwan Normal University, Taiwan
Multimedia signal processing, Video coding, Video communication, AI, Image/video processing, Deep learning, 3D reconstruction
Haibo Zhang, University of Otago, New Zealand
Body area networks, Mobile ad-hoc networks, Sensor networks, Vehicular networks
Jinghui Zhong, South China University of Technology, China
Evolutionary computation, Multi-objective optimization,
Reinforcement learning and Agent-based modeling

ELSEVIER

Amsterdam • Boston • London • New York • Oxford • Paris • Philadelphia • San Diego • St. Louis

Editorial Board (Continued)

Communications and Networks for B5G and 6G

Executive Editors

Takeo Fujii, The University of Electro-Communications, Japan
Cognitive radios, Dynamic spectrum management, ITS/Telematics, Software defined radios, Wireless communications
Jun Heo, Korea University, South Korea
Channel codes, LDPC codes, Physical-layer security, Polar codes, Turbo codes
Sunwoo Kim, Hanyang University, South Korea
Beamforming, Location-based services, Signal processing for communications, Underwater networks, Vehicular networks
Dongkyun Kim, Kyungpook National University, Korea, Republic of
Ad hoc mobile networks, Car and vehicular IT, Sensor networks, Vehicular networks, Wireless mesh networks and protocols
Jang-Won Lee, Yonsei University, Korea, Republic of
Cellular and broadband wireless networks, Green networks, Mobile ad-hoc networks, Resource allocation and management
Mostafa Zaman Chowdhury, Khulna University of Engineering and Technology, Bangladesh
Cellular and broadband wireless networks, Heterogeneous networks, Mobile communications Resource allocation and management, Wireless communications
Sangheon Pack, Korea University, Korea, Republic of
Content-centric networks, Network architectures, Future Internet, Mobility models and management, Network management

Editors

Mohamad Yusoff Alias, Multimedia University, Malaysia
Wireless Communications, OFDM, Multiple antenna systems, Multiuser detection, Genetic algorithms in communications, Multimedia applications, Visible light communications
Ali Balador, Ericsson Research, Sweden
Wireless Networks, Edge cloud computing, Network securityl, IoT, Resource allocation
Vo Nguyen Quoc Bao, Van Lang University, Viet Nam
Wireless communications, Signal processing for communications, AI for Wireless
Paolo Bellavista, University of Bologna, Italy
Pervasive and Mobile Computing, Middleware, Edge Computing, Industry4.0, Online Stream Processing, Sensor Network
Gangil Byun, Ulsan National Institute of Science and Technology, South Korea
Antenna systems, Antennas, Beamforming, RF front-end circuitries and modules, Smart antennas
Davide Careglio, Universitat Politècnica de Catalunya, Spain
Network protocols, Algorithms and architecture, Cloud communication, Future Internet, AI-assisted network control and management
Ho-Shin Cho, Kyungpook National University, South Korea
Cellular system, Medium Access Control, Nano(scale) network, Resource allocation and management, Underwater network
Kae Won Choi, Sungkyunkwan University, South Korea
Wireless communication, Mobile networks, Wireless power transfer
Nakjung Choi, Nokia Bell Labs, USA
Cloud computing and networking, Mobile network, End-to-end orchestration, Network slicing, O-RAN
Yeon Ho Chung, Pukyong National University, South Korea
Visible light communications, Optical camera communications, Free space optics, RIS, Optical scattering (Ultraviolet) communications, Machine learning/Game theory based optical transmission, Orbital angular momentum transmission, Advanced wireless communications
Nhu-Ngoc Dao, Sejong University, Viet Nam
Network softwarization, Mobile cloudification, Communication security, Intelligent systems, Intelligence of Things, Wireless communications, Interference mitigation, MAC routing protocols, Networking architecture
Thuan Dinh Do, University of Mount Union, USA
Reconfigurable Intelligent Surfaces-Assisted networks, Heterogeneous networks, Massive MIMO, Cooperative MIMO communications, mmWave communication networks, Energy harvesting, Full-duplex communications, Cognitive radio, Small-cell, Non-orthogonal multiple access NOMA, Secure PHY, UAV networks, Visible Light Communication, IoT system
Zbigniew Dziong, École de technologie supérieure, University of Quebec, Canada
Domain of performance, Control, Protocol, Architecture, Resource management for data, Wireless, Optical networks, Fog-cloud networks
Mauro Femminella, University of Perugia, Italy
Networking, Computer science
Daquan Feng, Shenzhen University, China
URRL, CInternet of things, Energy-efficient network design, LTE-U
Vasilis Friderikos, King's College London, United Kingdom
AI in Networking, Wireless networking, Mobile computing, Future Internet, 5G and Beyond, Architectural aspects of the future Internet
Javier Gozalvez, Universidad Miguel Hernandez de Elche, Spain
V2X, Vehicular networks, Industry 4.0, ITS, 6G
Go Hasegawa, Tohoku University, Japan
Computer communications, Computer networking, Transport architecture for future high-speed networks
Jun Huang, South Dakota State University, USA
Network management and network security, Traffic identification and network behavior, Computer network
Taewon Hwang, Yonsei University, South Korea
Ad hoc mobile networks, cloud computing and data center, cognitive radios, cross-layer design and optimization, green communications
Sang-Woon Jeon, Hanyang University, South Korea
Information Theory, Communication Theory, Wireless Communications
Hu Jin, Hanyang University, South Korea
Wireless communication systems (5G, 3GPP LTE-Advanced Pro), Random access networks (IEEE 802.11, CSMA, ALOHA), Machine-to-machine (M2M) communications, Network theory, Queueing theory, Information theory, MIMO transmission techniques, Distributed antenna systems, Hybrid ARQ strategies, Physical layer security, Interference alignment
MinChul Ju, Kookmin University, South Korea
Cognitive networks, Cooperative communications, Green communications, Multi-hop wireless networks
Haejoon Jung, Kyung Hee University, South Korea
Communication theory, wireless communications, wireless power transfer, and statistical signal processing
Sungtek Kahng, Incheon National University, South Korea
RF, Meta-materials, Microwave filter, Diversity antennas, Beamforming antenna, B4G / 5G antenna, Wireless power transfer
Joonhyuk Kang, Korea Advanced Institute of Science and Technology, South Korea
Cognitive radios, Digital modulations and demodulations, Wireless communications
Sang-Hyo Kim, Sungkyunkwan University, South Korea
Modern coding theory, LDPC codes and polar codes, Wireless multi-terminal communications, D2D communications, LTE-A, Signal design and secure communications, Code design for distributed source/video coding
Sangkil Kim, Pusan National University, South Korea
Antennas, Beamforming, Micro-Millimeter-wave circuits and systems, RF Front-end circuitries and modules, Wireless power transfer
Yun Hee Kim, Kyung Hee University, South Korea
Wireless communications, Mobile communications, Nonorthogonal multiple access, Intelligent reflecting surfaces
Feliksas Kuliesius, Vilnius University, Lithuania
Content distribution network (CDN), Content-centric networks, Internet of things (IoT), Network security, Vulnerability and defenses, Software-defined networking
Taesoo Kwon, Seoul National University of Science and Technology, South Korea
Wireless networks, Stochastic geometry, Machine Learning, Optimization
Kyunghan Lee, Seoul National University, Korea, Republic of
Mobile communications, Mobile computing, Mobility models and management, Web services and performance, Wireless communications
Jaime Lloret, Universitat Politecnica de Valencia, Spain
Network Protocols, Network Algorithms, Wireless Sensor Networks, Ad Hoc Networks, Multimedia Streaming
Pietro Manzoni, Universitat Politècnica de València, Spain
Mobile Networks and Systems, Internet of Things, Publish/Subscribe systems
Ioannis Moscholios, University of Peloponnese, Greece
Next Generation Networks, Performance Analysis of Network Protocols, Teletraffic Engineering, Network Management in Telecommunication Networks, Performance Evaluation and Optimization of Telecommunication Networks, Network simulation, UAV, Machine Learning
Jad Nasreddine, i2CAT Foundation, Spain
Cognitive radio, Propagation, Small cells, Network planning and optimization, 5G, Cognitive and heterogeneous networks, Radio resource management, Green networks, Stochastic and context-based techniques
Jungsuek Oh, Seoul National University, Korea, Republic of
Antenna systems, Antennas, EMI/EMC and SI/PI, Micro-/Millimeter-wave circuits and systems, RF front-end circuitries and modules
Gaofeng Pan, Beijing Institute of Technology, China
Performance modeling and analysis of wireless communication systems including integrated space aerial terrestrial communications, Cooperative/relay/CR communications, Free-space optical communications, Secure communications, etc. MAC layer related algorithm design (energy consumption analysis, power control, MAC protocol, etc.) in wireless networks
Shuping Peng, Huawei Technologies Co Ltd, Korea, China
5G, FMC, Mobile Edge Computing, Network Virtualisation, Data Centre
Anh T. Pham, The University of Aizu, Japan
Broadband access technologies, Communication theory, Cooperative communications, Green communications, Information security, Multi-user/multi-points transmission
Haythem Bany Salameh, Al Ain University, United Arab Emirates
Wireless networks, Cognitive Radios, Sensor Networks, Optical communications, Emphasis on dynamic spectrum access, IoT, Security, Distributed protocol design
Nurul Sarkar, Auckland University of Technology, New Zealand
Wireless communication networks, Network protocols, IoT, Cognitive radio, UAV, Energy efficient protocols
Md. Shahjalal, University of Liberal Arts Bangladesh, Bangladesh
Optical and terahertz wireless communications, Internet of things, Low power wide area networks, Advanced multiple access technologies, Next-generation intelligent networking
Oh-Soon Shin, Soongsil University, South Korea
Device-to-device communications, MIMO techniques, Mobile communications, Wireless communications, Wireless power transfer
Soo Young Shin, Kumoh National Institute of Technology, South Korea
Wireless communication, Wireless network, Unmanned mobile robots, Future Radio Access Technology, B5G/6G
Paulo Simões, University of Coimbra, Portugal
Network Management, Critical Infrastructure Protection, Cybersecurity
Andrej Stefanov, IBU Skopje, Macedonia
Communication theory, Wireless and mobile communications, Channel coding, Joint source-channel coding, Wireless communications and networks
Aimin Tang, Shanghai Jiao Tong University, China
B5G/6G networks, Integrated sensing and communications, Full-duplex communications, mmWave/THz communications, UAV/U2X networks
Filip De Turck, Ghent University, Belgium
Softwarized networks, Network Management, Orchestration, Multimedia services, AI-based approaches, Data processing
You-Chiun Wang, National Sun Yat-Sen University, Taiwan
Wireless and Mobile Networks, Internet of Things, Network Softwarization
Liang Wu, Southeast University, China
MIMO wireless communication, Integrated sensing and communication, Wireless localization, Optical wireless communication
Xiang-Gen Xia, University of Delaware, United States of America
Wireless communications, Radar signal processing
Heejung Yu, Korea University - Sejong Campus, South Korea
Wireless communications, 5G, Wi-Fi, Statistical signal processing, Signal processing in wireless system design localization

Blockchain and Security

Executive Editor

Ilsun You, Kookmin University, Korea, Republic of
Security for Mobile Networks, Authentication and Access Control, Formal Security Analysis, Insider Threats and Information Leakage Prevention, Digital Rights Management, Code Protection

Editors

Ahmed A. Abd El-Latif, Menoufia University, Egypt
Quantum information processing, Cybersecurity, Deep learning, Internet of Things (IoT), Big Data, Blockchain
Tiago Cruz, University of Coimbra, Portugal
Anomaly detection, Communications and Networks for B5G and 6G, Communications Technology, Computer network management, Computer Networks, Cyber-attack detection, Risk assessment, Cyber-Physical Systems, Data acquisition (SCADA), Services, Applications and Emerging Topics
Brij B. Gupta, National Institute of Technology Kurukshetra, India
Information security, Cyber Security, Intrusion detection, Cloud Security, Mobile Security, Web Security, Big data analytics, Botnet Detection, Phishing, DDoS attacks, Network Performance Evaluation, Economics
Jong-Hyouk Lee, Sejong University, Korea, Republic of
Information security, Mobility models and management, Mobile communications, Network security, Vulnerability and defenses, Vehicular networks
Dae Woon Lim, Dongguk University, Korea, Republic of
Information security, Network security, Vulnerability and defenses, Physical-layer security
Madhusanka Liyanage, University College Dublin, Ireland
Network Security, 5G, Software Defined Networking (SDN), Network Function Virtualization (NFV), Mobile networks, Internet of Things (IoT), Blockchain, Multi-Access Edge Computing (MEC) and Virtual Private Network (VPN) domains
Ki-Hyung Kim, Ajou University, Korea, Republic of
Computer Networking, Routing, Network Architecture, Networking, Network Communication, Network Security, Wireless Computing, Information and Communication Technology, Cloud Computing, Security, Blockchain, IoT
JeongGil Ko, Yonsei University, South Korea
Mobile and ubiquitous computing system design for the Internet of Things, Embedded and mobile sensor data-based machine learning application system design, Deep learning model compression and optimization for embedded and mobile device operations, Healthcare applications using mobile and embedded computing systems, Interfacing humans with mobile sensing system
Tae (Tom) Oh, Rochester Institute of Technology, USA
Information security, Internet of things (IoT)
Vishal Sharma, Queen's University Belfast, United Kingdom
Cyber-Physical Systems, IoT Behavior Modeling 5G and Beyond Networks, UAV Communications, Blockchain Systems, Mobile Internet Systems, Autonomous, Adaptive and Distributed Systems
Dongwan Shin, New Mexico Tech, USA
Computer Security and Privacy, Software Engineering
Qin Xin, University of the Faroe Islands, Faroe Islands
Algorithms, Distributed Computing, Wireless Communication, Cryptography, AI, Design and analysis of sequential, Parallel, and distributed algorithms for various communication, Optimization problems in wireless communication networks, Fuzzy graph, Cryptography and digital currencies, Quantum money

Services Applications and Emerging Topics

Executive Editors

Hyukjoon Lee, Kwangwoon University, South Korea
Bio-inspired ad hoc/sensor network protocols, Situation-aware networking, SDN-based networking platforms for heterogeneous communication in Io
Leandros Maglaras, Edinburgh Napier University, United Kingdom
Information Security, Cryptography, Authentication methods, Risk Management, Vehicular networks
Francesco Potortì, ISTI-CNR, Italy
Internet of things (IoT), Location and context aware services, Location-based services (LBS), Positioning and navigation applications, Sensor networks
Qiao Wang, Southeast University, China
Big data, Image signal processing, Information theory, Social computing and networks

Editorial Board (Continued)

Editors

Sasan Adibi, Deakin University, Australia
Mobile Health (mHealth), Electronic Health (eHealth), Wireless Security Quality of Service (QoS)
Ihsan Ali, Southeast Missouri State University, USA
Wireless Sensor Networks, Sensor Cloud, Fog Computing, Routing Protocol in WSNs
Luca Davoli, University of Parma, Italy
Internet of Things, Software Defined Networking, Big Stream, Security, Pervasive computing
Gianluigi Ferrari, University of Parma, Italy
Wireless networking and communication, Signal processing, Internet of Things, Smart things and Cyber physical systems (with large data collection)
Fei Hao, Shaanxi Normal University, China
Social computing, Soft computing, Big data analytics, Pervasive computing and data mining
Hyunbum Kim, Incheon National University, Korea, Republic of
Internet of Things (IoT), Next Generation Systems with AI Perspective, Intelligent Systems, Unmanned Aerial Vehicles (UAVs), Smart Cities, Blockchain-based System, Mobile Computing, Vehicular Ad Hoc Networks (VANETs), Wireless Sensor Networks, Privacy, Cyber Security
JongWon Kim, Gwangju Institute of Science and Technology, Korea, Republic of
Cloud computing and data center, Content distribution network (CDN), Content-centric networks, Future Internet, Media streaming
In-Young Ko, Korea Advanced Institute of Science and Technology, South Korea
Cloud computing services, Convergence software, Ubiquitous applications, Ubiquitous/pervasive computing,Web services and performance
Sang Hyun Lee, Korea University, Korea, Republic of
Coding theory, Internet of things (IoT), Positioning and navigations applications, Resource allocation and management, Wireless communications
Chun-Cheng Lin, National Yang Ming Chiao Tung University, Taiwan
Smart Manufacturing, Smart Healthcare Service, Smart Logistics, Internet of Things, Metaheuristics, Computational Management Science
Filippo Palumbo, National Research Council Pisa Research Area, Italy
Ambient assisted living, Context-awareness, Pervasive computing, Ambient intelligence, Activity recognition, Wearable computing, Smart home, Middleware, Location-based services, Wireless sensor network, Data fusion, Localization, Mobile computing
Kyung-Joon Park, Daegu Gyeongbuk Institute of Science & Technology, South Korea
Cyber-physical systems, Industrial communications, Smart manufacturing
Al-Sakib Khan Pathan, United International University, Bangladesh
Wireless Sensor Net Security, Wireless Networking, Internet & Web, AI & Intelligent Networking, Emerging technologies
Danda B. Rawat, Howard University, USA
Big data, Mobile cloud computing, Information security, Internet of things (IoT)
Sivaparthipan C.B., Tagore Institute of Engineering and Technology, India
Big Data Analytics, Blockchain, IoT, Software Engineering, AR/VR, AI, ML, Database and Data Mining
Carlos Becker Westphall, Federal University of Santa Catarina, Brazil
Network and Service Management, Security, IDS, IoT, Fog and Cloud Computing
